## Local & General

Mr. and Mrs. F. Clapp were Calgary visitors this week.

N. C. Chark of Lethbridge is the agent in charge during Mr. Collins absence on holidays.

J. G. Daugherty of Des Moines, Washington arrived in town on Wednesday and is being welcomed by his many friends.

Lost—License plates between Ray Warren's place and Champion. Finder please leave at Chronicle office.

Mr. and Mrs. C. Davis returned from a two weeks vacation spent at Radium Spring and Banff. They report a splendid trip.

Service will be held at Bus. on Sunday, August 14 at 230. Sunday school and service at Champion as usual.

Rev. Peter Dawson is supplying at Vulcan United Church during Rev. J. Brunton's absence on holidays.

Most of the holidaymakers are home again from their trips to various summer resorts and "business as usual" is again the order of things.

A number from Champion motored to Vulcan on Saturday evening to attend the Pool meeting with Mr. Parry as guest speaker.

Clarence Davis delivered a load of Red-wheat to the Pool elevator on Monday, Aug. 8. The wheat graded No. 1 and weighed 64 pounds to the bushel.

Miss Myrtle Taggart of Carstairs and Miss Grace Dingwall of Vulcan are guests at the home of Mr. and Mrs. F. Alder.

Frank Smith delivered a load of 1932 garnet wheat to the Pool elevator on Friday, Aug. 6. The wheat weighed 60 pounds to the bushel and graded No. 1. This wheat was straight combined.

Mr. A. M. Watt returned to Brant Monday, after spending the past few weeks relieving in the bank here, during the absence of Mr. H. Lamont.

J. Deporter, who has been a patient in the Holy Cross hospital Calgary for the past six weeks has recovered sufficiently to leave the hospital and will convalesce in Gleichen.

A. Siegel delivered the first load of new grain to the United Grain Growers' elevator on Wednesday, August 3. The variety was garnet, graded No. 2 northern and weighed 61 1/2 pounds to the bushel.

Miss K. Cowell of the Bank of Commerce staff received word Friday of her transfer to the north end branch of the Canadian Bank of Commerce Lethbridge.

E. Latiff is again confined to his home through illness and has been ordered by his physicians to take a complete rest cure.

Mr. Frank Dalsin, Leo and Gordon are spending a few days visiting relatives in this district.

Raymond Beingsesser, the nine year old son of Sam Beingsesser fell from his horse Wednesday morning and had the misfortune to break his leg. He was immediately rushed to the Holy Cross hospital Calgary.

"Mr. Ed. Latiff was taken to the Holy Cross hospital Calgary on Tuesday, having been ordered to take complete rest. Mrs. Latiff accompanied him.

## Tisdale Sisson Passes Suddenly

Funeral services for Mr. Tisdale Sisson aged 81 years, who passed away Wednesday morning in the Galt hospital Lethbridge will be held Friday afternoon at 230 o'clock, at the United Church, Rev. Dawson officiating. Interment will be made in the Union cemetery. Particulars will be found in next week's paper.

## Women's Institute

The local Women's Institute motored to Vulcan on Tuesday afternoon where they held their regular monthly meeting at the home of Mrs. A. T. Martin, Constituency Convener. Ten members answered the roll call and there were two guests present. Mrs. D. Watkins presided, and after a brief business session, "Current Events," prepared by Mrs. Alexander, were read by the Secretary. Mrs. Martin's beautiful garden, crab apple trees and fruit bushes laden with currants and berries, were a source of delight to the visitors. In conclusion a merry party gathered around the tea table to partake of the good things to eat provided by the picnicers. Appreciation of Mrs. Martin's kind hospitality was expressed by the hearty singing of—"For she's a jolly good fellow."

## Crop Report

Continued dry weather has reduced the estimate of yields considerably, but at least an average crop is expected. The grain is ripening rapidly, the crops making unusual headway and in several instances, especially oat of town, cutting has commenced. Swathing will be general by the end of the week. Samples of grain obtained indicate a high quality, mostly No. 1 northern. Yields are estimated from 15 to 25 bushels. Oats are being cut green due to grasshopper damage. It has been discovered that the pest is cutting the heads off and in order to save crop, cutting has been resorted to. Barley is ripe and in several instances threshing of same is under way.

## Local and General

Mrs. J. F. Hardisty left Monday for Spokane.

Mrs. U. G. Anderson is a guest at the home of Mrs. Boose of Kirkaldy.

Rev. Dawson and family returned from their vacation this week.

Mr. and Mrs. H. B. Brown of Strathmore are guests at the home of their daughter Mrs. Fred Watts.

Mr. and Mrs. A. Baker and Caroline and Mr. and Mrs. Wellman and family were recent visitors at Waterton Lakes.

Mrs. W. G. Laidlaw and infant son, who have spent the past two weeks in Calgary, are guests at the home of Mrs. Mary Woodhull.

Miss Ethel McDougall, who has been teaching at Jarvis, a point north of Edmonton, returned to Champion last week to spend the month of August at her home.

NOTES AND COMMENT.

Factors Producing High Quality Wheat

The soil and climate of the Canadian prairies are able to build the right kind of protein into Canadian wheat, which then becomes high in what is termed "milling and baking value." This quality is prized by the overseas miller who uses "strong" Hard Red Canadian wheat to blend in small quantities with inferior and cheaper wheats which by themselves alone would not make an acceptable nor palatable loaf. Only certain varieties of wheat, however, will respond to our soil and climate and produce high quality. It is important, therefore, for the Canadian wheat grower to use only recommended varieties, and furthermore, the one best suited for the soil and climate of his own district. There are at the most only four or five spring wheats suitable for the Canadian prairies, namely—Marquis, Reward, Red Bobs 222 (or Early Triumph), Garnet and Ceres. Surveys indicate, however, that we are producing over twenty varieties, most of them of poor milling and baking value; many fields also contain mixtures of varieties. If high quality is to be maintained all these unsuitable varieties and mixtures must be eliminated and only the most suitable variety grown. This can be done and with but little expense if the necessary steps are taken.

Russia as a Grain Exporter

The Dominion Bureau of Statistics states a measure of doubt exists as to what action Russia will take in regard to the wheat market next fall. It is known that the acreage sown to wheat this year is smaller than last year, about 7 million acres less, and that the fall spring sowing campaign was not completed according to the "plan." In addition severe drought conditions in certain areas in 1931 resulted in a serious lack of subsoil moisture which will affect the yield this year unless rainfall has been generous. It is equally true that Russia over-exported last fall, thereby creating a serious food, feed and seed problem in the present year. No doubt the Soviet government will be anxious to prevent a repetition of such conditions. In spite of the foregoing elements in the situation there are rumors that Russia has booked freight for August and September. These charters could be used, of course, for other commodities than wheat. No doubt financial considerations will again weigh in arriving at an export policy for 1932-33.

The Imperial Economic Conference at Ottawa struggles to arrive at some uniform percentage of Empire content in commodities. Empire content is the proportion of Common-wealth material or labor an article must possess to enjoy the preferential tariff. Canada at present demands 50 per cent, Australia 75, New Zealand 50, Britain only 25. One thing to be seriously effected will be goods made in American branch plants to be sold in the other Dominions. The conference delegates, proper and anxious, cannot, of course, ignore the general rights of world trade. Thus fair Empire intent will operate to hold fair Empire content down.

3,500 carloads, or 18,000,000 pounds, of binder twine are the estimated requirements for tying up the wheat crop of Western Canada this year, according to the Agricultural Department of the Canadian National Railways, which, in terms of relativity, is equivalent to 2,048,075 miles, or enough to go around the earth 31 1/2 times.

The supply of farm hands is now about double the demand, and farm wages are the lowest in thirty years. It seems now that "many hands make light pay."

# Scientific Advances Assist Economic Progress Only When Benefits Are Reciprocal To All

To aid directly in the efficient utilization of Canadian resources to meet Canadian needs: To aid as a nation in extending the bounds of man's knowledge: These are the objects of the National Research Laboratories, established at Ottawa by the Government of Canada.

Science, in the production of man's material needs, effected the industrial revolution. It flung wide the limits of goods and services at man's disposal. It made possible the support of populations exceeding populations of the pre-scientific era by hundreds of millions and it offers now today the possibilities of material and cultural advance beyond the dreams of other ages.

A few days ago, a speaker, before a secondary education conference in New York, made the following statement:

"Society is fundamentally different from what it was a few generations ago. Perhaps even as late as two generations ago it was impossible to produce enough for everyone."

"The long-term answer as to whether we can afford secondary education necessitates a consideration of the available economic resources of the United States. One hundred and forty years ago approximately 90 per cent of all the people were engaged in agriculture or allied pursuits. In other words, it took 90 per cent of the population to provide the basic food, clothing and shelter for the entire population. Today 30 per cent of the population can provide all of the food, clothing and shelter and leave 60 per cent to provide cultural services and other types of commodities and services."

Science says, in effect, today: "What we have now is our greatest power. Millions living in vast areas of the earth in sub-standard conditions of life even normal conditions of life are not sufficient to go around there is under-production. Until every individual is a millionaire, as in England, man recently declared extravagantly, there will not be over-production. The distribution of purchasing power in order that society may take full advantage of its own development and power is society's supreme responsibility. Extreme and uncoordinated individualism as Sir John Stimson has suggested, may not be the solution. A world of potential plenty has been wrought from a world of want and scarcity. So quickly has the transformation been effected that the possibilities of the changed circumstances in which man finds himself are yet but dimly appreciated. A fundamental change in the outlook of the common man is involved. There is potential economic energy sufficient to drive poverty from the earth. Thousands can be made available for new and greater tasks as society may direct."

It has been estimated that since the Great War the methods of production used by or available in industry in Great Britain have made it possible for at least a 50 per cent greater volume of goods to be produced with the same amount of labour. The International Labour Office reports that from 1920 to 1928 there was an increase of from 27 to 78 per cent in various industries, while in Austria from 1924 to 1927 there was an increase of from 27 to 78 per cent. In the United States during the period 1918-20 to 1924-26, the average output per worker in the four main branches of national activity (agriculture, mining, manufacturing and railways) rose by 27 per cent. In Great Britain according to the same source, the increase in production in a group of ten industries from 1924-1929-30 was 11 per cent, while at the same time the number of workers employed fell by 8 per cent.

The figures indicate the increased productive capacity of modern industrial equipment, contrasting sharply with the record of millions living in sub-standard conditions and emphasizing the necessity of comprehensive action.

The estimate that between 1840 and 1928—the period in which science made its greatest advances—the number of people in the world to be supported increased by more than 800,000,000, from 1,000 million to 1,800 million, leaves it charge that science has refused opportunity for employment and that further scientific work necessary there stand the records of the gigantic electrical industry, built from the findings of Faraday, of the chemical industry and many others employing millions which owe their present state of advance or their economic value to science.

The following statement was made by William Green, the President of the American Federation of Labour, in the New York Times of July 17, 1932:

"During the period of high producing activity—1922 to 1928—the number of unemployed was steadily increasing, because of the rate of technological change. Even at the peak of production the unemployed had mounted to 1,400,000. This was the result of installing improved machinery and new processes without planning for the workers displaced and the consequent loss of the vital economic progress. Technical improvements become authentic economic progress only when adjustments bring reciprocal profits to all. The progress in two directions—increasing opportunity for creative work and more adequate and dependable incomes. Neither groups can prosper unless their gains are shared with others. The poverty of one is a drag upon the prosperity of others."

When a country installs a new machine that, with a single operator, does the work of sixty-nine men, what becomes of the sixty-eight? When a glass-bottle machine with one operator turns out as many bottles as forty hand operatives, what becomes of the thirty-nine? A new machine to prepare good leaf for window signs reduced the payroll of one group from sixty-four to seven.

In agriculture, machinery made possible an increase of 1,185 per cent in productivity per worker between 1880 and 1924. This brought a displacement of labour of 80 per cent.

The printer-telegraph substitutes typist for trained More telegraph operators in addition to displacing typists.

"The number of telephone and telephone operators controlling railroads and traffic has steadily increased since 1921, in close correlation with technical changes. Automatic devices and central and remote control of train movements have brought a displacement. The decline between 1921 and 1931 for all groups in traffic control was 33 per cent.

"The loss of work opportunities to telephone operators through the dial system is 32.5 per cent.

"Mechanical music in motion-picture houses in Washington, D.C., displaced 60 per cent of the musicians in white theatres and 91 per cent in colored. Unemployment among all musicians is now 63 per cent.

"One operative and a ditch-digging machine can do the work that forty-four diggers with hand shovels formerly did.

"This problem of displaced workers is one which single companies or industries cannot solve within their own jurisdiction. It requires too wide a knowledge of economic trends and specific facts. To help meet the needs of business and then displace persons the Federation has proposed a federal agency accumulating information on man-hours of work by industries, workers available and potential, and the factors that determine productivity and output. Such an agency would perform for wage earners and management a service in some respects similar to that which the Weather Bureau performs for ships; it would report where highs and lows in employment are developing, broadcast warnings of danger and spread advice in business planning and organization of the labour market. Such an agency could help to avert a situation like the one that plagues us now."

There are 619 miles of subways in New York City, of which 213 miles are actually underground.

Antarctic, or the Antarctic continent, is believed to have an area of about 5,000,000 square miles.

## Old Sayings Modified

Original Meanings Of Many Have Been Practically Lost

Have you ever wondered what some of our everyday sayings mean, and how they originated? Some of them have practically lost their original meanings, and others have become very modified by the passage of time.

For instance, the expression, "As mad as a hatter," is only a corruption of, "As mad as an alter" or viper, and as the old meaning of "mad" was "venomous," the whole saying can be translated into "as venomous as a viper."

We do not, however, mean anything nearly as drastic as this when we use the saying nowadays.

Another saying which has altered somewhat in meaning is that a man "is not worth his salt." We do not literally mean that he is so degenerate as to be unworthy of the small sum expended on this household accessory, but that he is not worthy of his pay.

This is, of course, what the phrase originally meant, as the word "salary" coming from the same root as salt, was the money paid to a Roman soldier in order that he might be provided with that then highly prized commodity.

Some of our expressions date back to old customs, as with the phrase "to take pot-luck." In former days, and indeed in the present day, it was the custom, in some of our remote country villages to keep a large family cooking pot always boiling over the fire, and into this anything edible was thrown, so that when meal time each person dipped in for his or herself, and what they received was "pot-luck."

"To laugh up your sleeve" would seem a very peculiar thing to do if we look the saying literally, and yet it has its derivation in the fact that in bygone days sleeves were worn very wide and long, and if a person wished to hide a smile, he had only to lift his hand to his face to literally laugh up his sleeve.

## One Of The Really Great

Hon. Stanley Baldwin Is Always Kind To Camera-men

Some of the photographers at Ottawa were surprised at the readiness of Mr. Hon. Stanley Baldwin to pose for newspaper pictures. As soon as the English statesman saw the cameras approach, he greeted them with a smile.

Most of the really great men are like that. It is only the ones who think they are important that try to make a fuss about their pictures being taken. And those same chaps are usually anxious to get their pictures right on the front page.

Oyster fisheries in the United States now rank second only to the salmon fisheries in value.

Before his conversion, St. Paul was called Saul.

Here is the baby of the British Olympic team, shown as she had her first glimpse of New York, where she arrived, en route to Los Angeles. She is 16-year-old Mary Kenyon, one of England's foremost girl swimmers, who hopes to add to her laurels and at the same time help her country at the international games.

## Good Fishing In Saskatchewan

Fisheries and Streams Intrigue

The fishermen visiting in Saskatchewan will find ample opportunity to use his favorite rod and best tackle. A good all weather road leads north-west from Prince Albert to Sturgeon Lake (Nanew Lake), which is one of the noted picknick lakes of the district. It also contains pike, perch and whitefish. Emma Lake, thirty miles north-west of Prince Albert, is well supplied with fish and offers ideal camping locations. It is a beautiful lake with irregular shore line and extensive sandy beaches for bathing. It is surrounded by a heavy stand of trees, including spruce and birch. Sixty miles northwest of Prince Albert is Candle Lake, more difficult to reach, but offering miles of sandy bathing beaches surrounded by heavy spruce, jackpine, birch and poplar, wonderful scenery and an abundance of game fish.

## Message From Prince

A party of schoolboys leaving for Canada in the charge of Col. J. S. Hills, received a bonny message greeting from the Prince of Wales. "His Royal Highness," said the message "hoped the boys will visit his High River ranch in Alberta, and sends his best wishes for their ninth tour."

## Within His Rights

A Frenchman recently had her husband haled into court because he refused to utter a word of conversation at any meal time. The court decided a man had a right to eat in silent peace if he wanted to.

"Genuine education doesn't always come out of books."

## FRENCH-CANADIAN HANDICRAFTS

French-Canadian handicrafts and products of the loom from all parts of the province were on view when the fourth annual Provincial Handicraft Exhibition at the Manor Richelieu was officially opened by A. O. Bérubé, director of the Department of Handicraft of the Quebec Government. Here is Eve Bouchard, better known to thousands of Canadians as Maria Chapdelaine, heroine of the French-Canadian classic, with a charming piece of work. Mile. Bouchard now gives most of her time to improvement of living and working conditions among the women in the rural parts of Quebec.

# Rust Resistant Variety of Wheat May Be Available To Farmers Within a Period of Three Years

Rust, the disease of grain, has cost Canada in epidemic years as many as 100,000,000 bushels of wheat.

It has been estimated that the total yield of wheat on the Canadian prairie during each of the past two years has been reduced by drought by approximately the same amount.

At the annual meeting of the Associate Committee on Field Crop Diseases in Winnipeg on April 21, it was announced that a rust resistant variety of wheat would be available for distribution to the farmers within two or three years time. The hope of the Committee may thus be fulfilled just ten years after the attack on the rust menace was co-ordinated and accelerated by the appointment of the Committee. Dr. Robert Newton, the acting director of the Division of Biology and Agriculture, National Research Laboratories, and Professor of Plant Crops and Plant Biochemistry, University of Alberta, has said: "The solution of such a problem in that period of time must be regarded as a scientific triumph of the first order."

Under the aegis of the Associate Committee on Grain Research of the National Research Council a comprehensive programme of investigation into drought resistance is now being carried out on it at the University of Alberta.

Plans have been made for the work to be done at the University of Alberta and the University of Manitoba. The University of Alberta is following a fourfold programme:

- (a) To ascertain the resistance of wheat varieties to drought.
- (b) To study in detail certain morphologic and physiologic characters associated with drought resistance.
- (c) To study the mode of inheritance, and genetics, of drought resistance.

(d) To produce desirable strains of wheat resistant to drought.

With assistance from the Council the work that has been in progress at the University of Alberta will be expanded. At the University of Manitoba, the Council is making it possible to do for Durum wheats what has already been done on such a large scale in various laboratories for bread wheats. Because of the demand, particularly in Italy where it is used for the manufacture of such alimentary pastas as spaghetti and macaroni, Durum wheats have been selling at a premium over the bread wheats. It constitutes a large percentage of the wheat production of Manitoba and is not so susceptible to the more common forms of rust as the bread wheats. The drought resistance programme of the Associate Committee on Grain Research, is in its suitability for growth in dry climates.

With the recent destructive effects by drought to agriculture in the United States several major projects on drought resistance in field crops have been developed there, but it is probably in Russia that to date the most extensive studies on this problem have been made. The Lenin Academy of Agricultural Sciences has an organization known as the Institute of the Control of Drought, organized for this particular purpose. A special journal devoted to the publication of material on drought, is issued by the Institute. Several new drought resistant varieties, superior in yield as well as in quality to other Russian wheats, have been developed by the plant breeders of that country.

In 1928 the University of Alberta received a number of Russian wheat varieties which were developed for growing in a zone with a limited precipitation. During the past three years these varieties have proved to be superior to our own common grown varieties in resistance to drought but are very inferior in certain other agronomic characters, especially in yield. In 1929 Dr. O. S. Aamott, Professor of Genetics and Plant Breeding at the University of Alberta, commenced a breeding programme by making nine crosses between the Russian varieties and local strains which are superior in those characteristics in which the Russian varieties are inferior. The hybrid material developed in this way has reached the segregating generations and now an intensive study is about to be begun. Arrangements have been made to conduct the field tests on dry land at Brooks, Alberta. These field tests are made possible through the assistance given for field work by the Canadian Pacific Railway Irrigation Division and the Searle Grain Company.

The rest of the work on the project will be conducted at the University where laboratory and greenhouse facilities are available.

An apparatus in which it will be

possible to generate artificial "chill-o-ke" has been constructed. It is similar to that used by Dr. V. V. Talanov, one of the Russian experts in drought resistance. It consists of a glass-in chamber connected with a fan to a heating apparatus. Plans for wind blasts and equipment for temperature and humidity control are placed in the fan. Plants to be tested are grown in the greenhouse or in pots in the field in summer, and then moved to the special chambers where various combinations of wind, temperature, humidity and soil moisture can be supplied. The chill-o-ke winds which have been mentioned are the warm dry winds which at frequent intervals, and without much warning, blow down the passes of the Rocky Mountains on to the plains, particularly in southern Alberta.

Investigations involving plant breeding and efforts to discover the fundamental nature of drought resistance, as the cereal rust work has indicated, require many years to bring to completion. Dr. Aamott thinks, however, that valuable progress should be made in the work to produce desirable strains of wheat that are resistant to drought in ten years time. Three years work has already been done on it at the University of Alberta.

## Spurs All Barriers

Ontario Farmer Claims He Owns Champion Hog Jumper

Who owns the champion jumping hog in Ontario?

Probably J. W. Coulter, who lives seven miles south of Redversville, Prince Edward County, Anyway, he is the little fellow who someone puts up a better record, which is doubtful. Here is the story as related by Mr. Coulter:

I have a three-year old Yorkshire sow which took to jumping out of the pen. I could not keep her in, so I added a board all around. She went over that. I added another and she took the leap over that. Then another which made the total of five feet in height, and behold—she cleared that with ease.

## Patronize Home Product

Statistics Show Manitoba Girls Prefer Canadian For Husbands

Manitoba brides prefer natives. Whatever the romance of far countries, the charms of strange people, they pick the home product first when choosing a life mate. The latest vital statistics for the province of Manitoba show that five times out of six Manitoba born girls marry British subjects or prefer Canadians. The remainder prefer Slav or Teutonic spouses to Asiatics or even Latins, and only one in a couple of thousand marries a black. And the home preference goes double for Manitobans.

## Arctic Islands Preserve

Wild Life Sanctuary Consists Of Large Land Area

The area of wild life preserves set aside for the benefit of natives by the Department of the Interior, in the North West Territories, Canada, has been extended by taking in all islands under Canadian jurisdiction north of the districts of Mackenzie and Keewatin, with the exception of a part of Bath Island. This large area is now known as the Arctic Islands Preserve. It embraces a land area of 439,103 square miles.

## Insures Church Collection

A country minister in Australia has insured his Sunday collections against rain. In case of a downfall calculated to interfere with the attendance he will get \$20, and if it costs him \$1.50 weekly to carry the policy it is not known whether prayers for rain were excluded in the bargain.

"The maid found a silver spoon in the hall, sir."

"Another gump with a hole in his pocket!"—Buen Humor, Madrid.

## The 40th Anniversary of "SALADA" TEA

For 40 years SALADA has given the finest quality in tea. Present prices are the lowest in 15 years.

### Lessons Of The Depression

A cabinet minister in one of the prairie provinces has expressed the view that the present business depression in this country is "a blessing in disguise" because it is teaching people many lessons which it is in their own interests and in the interests of the country at large they should learn.

While one can agree that many people are learning some rather hard lessons these days, taught in the school of bitter experience, we are hardly prepared to go so far as to regard such experiences as "blessings," even in a disguised form. The men and women out of work in cities and towns, and the farmers who have suffered complete crop failure year after year, and who have not been able to market such surplus crop as they may have succeeded in raising at a price above the cost of production, and both of which groups have, of necessity, been forced to subsidize Government and Municipal relief, and go deeper into debt for that relief, fall to see where the "blessing" comes in.

But it cannot be denied that some valuable lessons are being learned, hard and bitter though the experience of learning those lessons may be. And if these lessons are thoroughly learned, taught to heart and not forgotten when the difficult days of the present have passed, then the trials and hardships of the present will not be all loss; there will be some profit in future years.

Quite a few people, for example, have learned to appreciate the value of having a little something in reserve, something laid by for a rainy day, as the old adage puts it, or, perhaps, on the prairies we could more appropriately say, for a dry year. The mistake of spending up to the last dollar of one's income in years when they had incomes has been impressed upon thousands of people, and it is probably safe to predict that, when once again these people are in receipt of incomes in excess of their actual living requirements, they will lay something aside by small instalments from their weekly wages or annual farm operations.

Governments, too, have probably had the lesson enforced upon them that they likewise must accumulate reserves in years of prosperity to tide themselves and their people through the lean years, rather than, as in the past, embark on large spending programmes when revenues are large and easy to collect. Public debts should be reduced in good years, because they are bound to rise in bad years. When times are generally prosperous, Governments can afford to hold off large programmes of public works and construction, and proceed with them when general employment declines and it is necessary to provide work.

Governments and large industrial employers of labor, it is to be hoped, have also learned to appreciate the fact that they have an obligation towards all the people on the one hand and their own employees on the other, and that the profits accruing to industry in good years must not, in the future, be all distributed in dividends to shareholders, or held in reserve to pay dividends when business drops off, but that an adequate percentage of those profits must be set aside in some form of unemployment insurance in order to provide protection for the workmen who assisted to create those profits.

In future labor in industry must be protected just as effectively as the shareholders in industry. Many large farmers realize this, and even welcome it, but it is the duty of Governments to see that it is universally adopted.

Another lesson that is being learned is the un wisdom of putting all one's eggs in one basket, to quote another old proverb. In good times many business men have re-invested all their profits in expanding their businesses far beyond the needs of normal years. They have acted as if "boom" conditions would always prevail, with the result that when business declined they had plants on their hands, with heavy overhead expenses, which it was impossible to carry under decreased business conditions. The same thing can be said of many farmers. When crops were good and prices high, they bought more and more land, and more machinery, more everything, frequently borrowing large sums to enable them to do these things. Then with smaller crops and lower prices they found they could not make money, could not pay their debts, while if they had held some of their former profits in reserve instead of tying them all up in so-called fixed assets, which often turned out to be liabilities, they could have carried on without much worry.

Lack of ready money in this depression has taught many of us how to really economize; how many things we can do for ourselves if we will; how many things we actually do not need which we formerly thought we must have. A list of such things, each perhaps small in itself, could be given that would fill this newspaper column. And we are actually better off for the doing of things for ourselves instead of having somebody do them for us.

Some readers may think we are advocating a lower standard of living. Not at all. The standard of living in this country should mount steadily higher and higher. The difficulty is that we have confused what is essential to a high standard of living and what is not. Some things are essential to such a standard, but many things we have regarded as essential are not; rather they are pure luxuries, and these we should do without until we are well able to afford them. They should never be purchased until some reserve has first been accumulated.

Less mushroom growth; less waste and extravagance than in the past; continued economy in the matter of non-essentials such as we have been forced to practice recently; the building up of some reserve;—these are requirements for the future; they constitute some of the lessons of the depression.

#### Might Try Again

The following correction appeared in a small town paper: "Our paper carried the notice last week that Mr. John Doe is a detective in the police force. This was a typographical error. Mr. Doe is really a detective in the police force!"

## Summer Complaint

"I have found Baby's Own Tablets the best of all children's remedies for Summer Complaint, Colic, Croup, and Constipation," writes Mrs. George Walker, Thomasburg, Ont. Certificate of Sale for each 25c package. More than 1,250,000 packages sold in 1931.

**BABY'S OWN TABLETS**

"What that" asked Sandy, pointing to something on Donald's nose. "It's a mole," answered Donald. "Well," said Sandy, "the mole's moving, Donald."

Many a woman gives a party just for the pleasure of not asking her dearest enemy.

Argentina is making a variety of paper from straw pulp.

#### PERSONAL

**SCOTTISH LADY AT PRESENT IN** Canada, would like to take in charge one or more young ladies, has experience in travel abroad, and with Canadian girls. Could act as companion to lady, in any part of Canada, or as travel companion. Has excellent testimonials both in Canada and in Britain. #### An Interesting Document

Old Trading House Rules For Women In 1643

A document recently brought to Winnipeg, Manitoba, from one of the northern trading posts of the Hudson's Bay Company, dated back to 1643, shows the following provisions relating to women.

**Marriages**—Throughout the country, in the absence of clergymen, chief factors only shall solemnize marriages, and no person shall be permitted to take a wife at any establishment without the sanction of the gentleman superintending the district.

**Employment for the women and children**—In the course of the week, due attention shall be bestowed to furnish the women and children with such regular and useful occupation as is suited to their age and capacities, and best calculated to suppress vicious and promote virtuous habits.

**Education**—As a preparation to education, the women and children at the several posts in the country shall be addressed and habituated to converse in the language (whether French or English) of the father of the family, and that he be encouraged to devote a portion of his leisure time to their instruction as far as his own knowledge and ability will permit.

#### Contribution To Science

Report New Scientific Discovery Made By Curie Family At Paris

Mme. Marie Curie's family has made a new contribution to science. The discovery of a ray stopped more easily by common paraffin than by lead is reported in Nature, British Journal of pure science.

Irene Curie, daughter of the famous woman scientist, and F. Joliot, the daughter's husband, report the discovery, and this ray is probably a beam of neutrons, almost infinitely tiny things called as new "ultra-minute particles" of matter.

The discovery opens light on the possible nature of neutrons.

**Persian Balm** is a true elixir of youth, refreshment and rejuvenation. Adds a youthful charm to the complexion, softens and beautifies the skin. Makes hair beautifully white, indispensable to the woman who appreciates subtle distinction. Delightful to use. Delicately fragrant. So the dry and irritated skin becomes soft and preserves. A flawless toilet requisite for the busy, modern woman. A true elixir to beauty.

#### Canadian Salmon

Canada Leads In Canned Salmon Exports Of Great Britain

Canada in the first six months of 1932 has definitely maintained the leadership in the canned salmon exports of Great Britain, which she captured from the United States in 1929. British trade figures show that in the first six months of 1932, the United States supplied 10,037,264 of the total export of 22,160,025 pounds, and Canada was second with 4,603,200. In 1931 Canada assumed first place with 9,560,544 pounds, and United States was second with 7,141,896. This Canada sent 8,991,983 pounds in Canada's 3,977,264.

The Last Asthma Attack may really be the last one if prompt measures are taken. Dr. J. D. Kellogg's Asthma Remedy will safeguard you. It will penetrate to the smallest bronchial passages and bring about a healthy condition. It always relieves and its continued use often has a permanent effect. Why not get this long-forgotten remedy today and commence its use? Inhale as smoke or vapor it is equally effective.

#### Hatching Wild Ducks

Nature is being assisted in keeping up the supply of wild ducks for the sportmen of Manitoba. Eight thousand young wild ducks have been hatched in incubators and are now learning to swim in the waters of Lake Winnipeg. Eggs were gathered near the lake and the young birds, though hatched by artificial means, present a healthy appearance. The experiment has been so successful that it is proposed to hatch 16,000 in this way next year.

#### The Same Name

A woman entered a meat store with her small daughter. Seeing some things in the refrigerating case, the little one asked what it was.

"Tripe, dear," replied her mother. "That's funny," said the child. "Mummy says that's what we get over the radio."

The woman who marries a man because she is sorry for him is apt to be sorry for herself later on.

A pinch of grease will keep ashtray from sticking.

The glow of phosphorus is due to slow oxidation.

### End Of Reparations

Conference At Lausanne Marked A Great Step Forward

To speak of the Lausanne Conference as if it were a European conspiracy against the United States is totally wrong. Lausanne marked a "great step forward." It showed the European nations have returned to sanity, after all the madness of war and post-war nationalism. Because the Lausanne settlement will sooner or later bring the United States to a reconsideration of war debts, that inevitable result is not brought about by the desires of the Lausanne negotiators but only by their mutual recognition of their helplessness in the face of existing conditions.—Winnipeg Tribune.

### Miller's Worm Powders, being in demand everywhere, have got at very small cost. They are a reliable remedy for worm troubles and can be truly relied upon to expel worms from the system almost without the sufferings that worms cause. There are many mothers that rejoice that they found available so effective a remedy for the relief of their children.

### Practically His Own Doctor

**Prince Of Wales Has Profited By Much Advice**

The Prince of Wales has become his own doctor—to a certain extent—according to his own testimony before the British Medical Association.

"I have had much good advice," he told the learned physicians, "and have also learned like many others how to keep myself fit—that I have to some extent become my own doctor. The doctor," he added, "is certainly our first friend in life and our last."

The Japanese government is considering spending \$10,000,000 in buying more private railways.

### Thousands of MOTHERS ARE GRATEFUL

"... I wish I had known about this when I raised my first baby," say many mothers tell us.

"Indeed, crying, when the mother grows old, Our New Baby Welfare book tells how to keep your baby laughing and well—Joy rather than a care. Write today and it will be mailed to you free."

The Barnes Co., Limited, 113 George St., Toronto, Ont. Send postal note "Baby Welfare."

### French Take To Air

Private Pilot's Licenses Show Big Increase This Year

French citizens are taking to the air for their own pleasure in greater numbers, according to the increased number of private pilot's licenses granted by the French government during the year ended March 1932, which totaled 465 as compared with 131 during the same period of last year, states a report from Assistant Trade Commissioner H. C. Schuetz, Paris, France.

"If I were married, darling, the hours would roll by without our noticing them."

"She: 'Do you mean we probably wouldn't be able to afford it?'"

France is the principal world source of bauxite, from which aluminum is derived.

### New Question Raised

**U.S. Charged On Goods Made At Sea**

The United States Supreme Court was asked to decide whether customs duties can legally be imposed on articles produced on the high seas.

The question was raised by the Proctor and Gamble Manufacturing Company of Cincinnati on the importation of whale oil used in the manufacture of soap.

Under protest it paid a duty of six cents a gallon on the oil, taken in the Ross Sea by Norwegian seamen under contract and brought out to recover the money.

The trial court held that ships at sea and the property in them are a part of the country to which the ship belongs and that the whale oil was taxable as coming from Norway.

### It Will Prevent Ulcerated Throat.

At the first symptoms of sore throat, which presages ulceration and inflammation, use a spoonful of Dr. Thomas' Electric Oil. Add a little salt water to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to quinsy have thus made themselves immune to attack.

### Sen Of Charles Dickens

Sir Henry Dickens, K.C., only surviving child of Charles Dickens, the novelist, is retiring from the position of Common Sergeant of the City of London, England, which he has held for 15 years. In this office he sits constantly as a judge at the Old Bailey. Sir Henry, who is 84, is the oldest judge still upon the bench.

Sweet and palatable, Thomas' Electric Oil is a powerful germicide for children, and it does its work evenly and promptly.

Glasgow, Scotland, is to have a new \$1,400,000 hospital.

## "WHY LOOK YOUR AGE?" asks Billie Burke

"I really am 39," says this famous star. "And I don't see why any woman should look her age."

"We on the stage must keep your youthful freshness. To do this through the years means, above everything, guarding complexion beauty. For years I have used Lux Toilet Soap regularly—it keeps my skin amazingly clear and soft."

Years ago Broadway stars eagerly adopted Hollywood's famous beauty soap—Lux Toilet Soap. Actually 1932's of the lovely complexion you see on the screen are cared for by this fragrant white soap that costs only 10¢!

**"I'm 39"**

W. N. U. 1934

## CANADA OFFERS TO DIVERT TRADE TO MOTHERLAND

Ottawa, Ont.—United States may lose millions of dollars as a result of a reciprocal trade offer made by Canada to Great Britain at the Imperial Economic Conference, Canada offered a market for \$150,000,000 in British products in return for preferential treatment for wheat, lumber, butter, fish, dairy products, live cattle, meats, including bacon; metals, vegetables and fruits.

Canada will admit free duty, or over lowered tariff barriers hundreds of British goods, including iron and steel products, anthracite coal, brass products, automobiles, glass goods and possibly chemicals, boots and shoes and some lines of cotton goods. If the two countries come to definite agreement it was said to be in Canada of United States branch factories.

In iron and steel products alone, Canada imported \$81,300,000 from United States last year and \$133,283,600 from Great Britain. Canadian imports of anthracite coal from United States totalled \$14,654,000 and from Great Britain \$4,745,600. It is proposed by Canada that it throw open to Great Britain its market for iron and steel and automobiles, and to import as much trade as possible from United States and other non-empire countries.

The Canadian offer will be considered by the British delegation and a definite decision made within a few days.

## Transients At Calgary

Unemployed From Coast Cause Serious Situation At Footpaths City

Calgary, Alberta.—Several hundred unemployed transients from British Columbia are walking Calgary streets after journeying from the Pacific Coast province via the rods. From 120 to 200 men drop off nearly every train from British Columbia, resulting in a serious situation here.

A number of the transients maintain they were forced out of British Columbia by the closing down of relief camps. They declare those who are non-residents of British Columbia are told to leave the province.

## Alberta Girls Drown

Mother Of One Makes Unsuccessful Attempt At Rescue

Ryley, Alberta.—Two girls were drowned while wading in a dam owned by the Canadian National Railways at Holden. They were Gladys Kirkland, 14, and Betty Roberts, 15, both of Ryley, 35 miles east of Edmonton. Miss Roberts drowned when she attempted to rescue Miss Kirkland. Mrs. Roberts, mother of Betty, attempted to save her daughter, but lost her life. She was rescued by an employee at the dam and was revived by pumpator.

## Early Wheat Delivery

Medicine Hat, Alberta.—First delivery of wheat from the new crop was made August 3, when J. G. Dale, farmer three miles east of here, brought in a load to the milling company. The wheat graded No. 1 Northern and farmers in the district are optimistic regarding this year's crop.

## "Free Fair" Was Success

Saskatoon, Sask.—Canada's first "free fair," held here has been a success, officials of Saskatoon's exhibition announced. Total attendance of 151,768, against \$2,000 the previous high mark set in 1928. The financial loss, if any, will not exceed \$4,000, contrasted with a loss of \$20,000 for last year.

## Spirit Of The West

Ottawa, Ont.—Impressed with the spirit of the west which, despite economic depression continued to look forward with optimism to the future, members of the British National Union, who have been touring Canada for the past two days, expressed themselves as full of hope for what was in store for this country.

Duchess Of York Thirty-Two

London, England.—The Duchess of York very quietly celebrated her 32nd birthday in London, August 4. Originally the duke and duchess were to spend the anniversary at Glamis Castle but the duchess' recent indisposition altered the arrangements.

W. N. 1504

## Port Ready For Business

Deep Sea Pier At Churchill Is Practically Finished

Churchill, Man.—While the rattling of riveting and the humming of construction machinery continue here, the end of the deep sea pier programme is in sight.

The grain galleries which will pour a flood of grain into the deep sea ships this month are finished. Freight sheds are practically finished. There are two sidings ready for trains, which will haul incoming freight to the city of the north. All that remains now is a bit of painting and cleaning up the construction debris. From now until the middle of the month the workmen will move south, as their jobs are completed.

There will be no spending orgy in The Pae, Man., as in other years, when big gangs "went out" en masse. This year the men will dribble out in small numbers. They will not have big "stakes," as they laid in the past years. They are sober-minded this year.

The Department of Railways and Canada has a full summer's dredging programme to carry out in the harbor. The marine railway for winter ships will be considerable activity during the shipping season, when incoming cargoes of mixed freight will have to be moved up to say nothing of further grain shipments, which may come from the prairies.

It is expected the season will come to a close here about October 15.

## Armament Reduction

U.S. Administration Hopes International Conference Will Open the Way

Washington.—The United States administration hopes the forthcoming international economic conference, in addition to opening the way for an improvement of business conditions, will prove to be one of the steps leading to a reduction of world armaments.

This is one of the points being considered at the state department and the White House where thought is being given to the qualifications of a group of men from which will be chosen the three American members of the separate committee that will plan the conference and survey the economic and financial phases of the problem.

## Floods Destroy Grain

Thousands Of Farmers In Central Manchuria Lose Everything

Harbin, Manchuria.—Twenty-one days of uninterrupted rains covered Central Manchuria into a vast lake and brought about a national disaster.

Tens of thousands of enormous stocks of grain and soy beans lost. Thousands of farmers and other residents have lost their homes and are flocking to the cities from the inundation.

The material damage is estimated at several hundred million Mexican dollars.

Harbin is isolated from the rest of the world by rail and the three branches of the Chinese Eastern railway are paralyzed.

## Celebrates Birthday

Ottawa, Ont.—The Imperial Conference paused for a few minutes to do honor to Rt. Hon. Stanley Baldwin, leader of the British delegation, on his 65th birthday anniversary. The congratulations of the assembled delegates were voiced by Prime Minister R. B. Bennett, chairman of the conference, in a little speech. Mr. Baldwin replied with a few felicitous remarks. Mr. Baldwin was born on August 3, 1867—the year of Confederation.

## Praise For Baldwin

London, England.—Sir Arthur Salter, at Liberal summer school, Oxford, said: "We have all been reading the speeches of Baldwin at Ottawa, and reflecting that if only Baldwin has the courage and persistence to translate into policy and practice the principle of his speeches he is certainly one of the great Liberal leaders of the day."

## According To Religion

Ottawa, Ont.—Of the total population of 10,376,786 enumerated in last census of Canada, 4,098,546 were Roman Catholics. There were 2,016,992 persons belonging to the United Church; 1,635,231 Anglicans; 870,482 Presbyterians; 443,229 Baptists, and 49,692 Lutherans. The figures were released recently by the Dominion Bureau of Statistics.

## Rich Silver Strike

Great Bear Lake District Attracting Many Prospectors

Calgary, Alberta.—Large silver deposits have been unearthed just south of Mile Lake, on the Bonanza property in the north where rich discoveries of minerals, including radium ore, is drawing thousands of prospectors. A word of discovery was made known recently by the Canadian Northern Mining Corporation, whose property adjoins that where the silver was located. Officers of the firm said the strike removed all doubt regarding the value of their own claims. They said it was the largest silver strike made in the area.

## IRISH REPUBLIC SAID TO BE AIM OF DE VALERA

Dublin, Ireland.—Senator Joseph Connolly, minister of posts and telegraphs, told the senate that creation of Irish Republic was a policy of President Eamon de Valera and that Great Britain could not hope to get its war debts considered by the United States "so long as this question remains unsettled."

His declaration was in debate that preceded the senate's adoption of a resolution urging the government to request regulations immediately with Britain with a view to settling the land annuities dispute which recently plunged the two countries into a tariff war.

(President de Valera told a mass meeting at Limerick last week he was not going to waste any more time in "fruitless discussions" to secure arbitration of the dispute, for which he said he saw little chance of solution.)

The resolution was introduced by J. C. Coughlan, Farmer Leader, member of the opposition majority.

"Leave us within the British Commonwealth of Nations," Senator Connolly said. "It is Ireland's only hope of salvation."

The policy of the De Valera Government, replied Senator Connolly, is one of creating an Irish republic including the six northern counties (Ulster), and that he declared, would remain the policy of President de Valera until it is achieved.

President de Valera previously served a warning in the dail eireann that unless orders for coal are transferred to the continent he might apply a prohibitive tariff on British coal.

The De Valera Government has sought unsuccessfully to stem the flow of British coal into the Free State, merchants regarding the new duty of \$1 a ton and continuing to buy from the United Kingdom in large quantities. The British coal of British coal has been imported since Sunday.

## WORLD'S LARGEST TOMBSTONE AT THIEFVAL

A great pilgrimage of women who lost husbands, sons and sweethearts in the Great War gathered on August 1st at Thiefval and saw the Prince of Wales unveil the empire's gigantic memorial to 15,000 officers and men who have "no known graves."

The name of every man is carved on the walls of the memorial archway, a massive structure designed by Sir Edwin Lutyens. It completes the circle of commemorative buildings erected by the Imperial War Graves Commission in honor of 1,100,000 men of the empire who made the supreme sacrifice.

"Let us advance to new conquests and international amity," was the challenge delivered by the Prince of Wales at the unveiling.

"It is fitting," said the Prince, "that this crowning stone in the work of

## STUDIES SHEEP INDUSTRY

Protect To Ottawa

L.C. Kind of the Agricultural Economics Branch, Canadian Department of Agriculture, who has left for Western Canada to resume the collection of information for the completion of the economic study of range sheep industry in Southern Saskatchewan, Alberta, and British Columbia.

## Transients Coming West

Premier Bracken Of Manitoba Wires

Winnipeg, Man.—Protests were voiced by Premier John Bracken, of Manitoba, to Hon. W. A. Gordon, Minister of Labor at Ottawa, against men from eastern Canada flocking into Manitoba on freight trains to seek harvest work. He stated police were preventing this travel except on freight trains, but allowing men to come west.

Inquiries indicate there are plenty of men here to take of the harvest," said the premier's telegram, "and arrival of men from other parts of Canada will interfere with reduction of unemployment relief lists and aggravate situation here. We respectfully urge that police also stop this movement westward, otherwise our program rendered much more difficult."

## On Board Of Directors

Ottawa, Ontario.—The appointment of J. Hungerford, acting president of the Canadian National Railways, to be a member of the Board of Directors of the Government-owned system was announced by Hon. R. J. Manion, Minister of Railways and Canals. His appointment to the board is dated from August 1. He fills the vacancy caused by the resignation of Sir Henry Thornton.

## Ships En Route To Churchill

Montreal, Que.—Two tramp steamers are en route to the port of Churchill on Hudson Bay to load grain for Europe. The "Potsdam" left from Antwerp while the "Sierren" left Oran, Algeria, for the Manitoba port on July 25. Grain rates for these steamers have not been announced. It is expected they will reach Churchill about August 15.

## Preparing Roll Of Honor

Saskatchewan Pioneers Of Eighties Asked To Register For Record

Regina, Sask.—A roll of honor of the pioneers of Saskatchewan of the '80s has been arranged for and will be prepared by Mrs. J. E. Bothwell, a provincial librarian and archivist.

A special book is being made by J. H. Lee-Crofton of the government of service, and all pioneers of the '80s are asked to register at the provincial library as soon as it is convenient for them. While the record will take the form of a roll of honor, another book will also be kept to record details such as dates, experiences, etc., which will be kept in the provincial archives.

## End Of Conference

Planned To Finish Work Of Imperial Party Delegates

Ottawa, Ont.—It is planned to wind up the Imperial Economic Conference of the Empire, August 16, just short of a month from the opening. It looks like an all-round success. As a visiting London journalist put it: "The conference, in spite of many traps, seems to be moving towards a successful issue."

The British delegation, headed by Rt. Hon. Stanley Baldwin, is booked to sail on the "Empress of Britain," August 20.

## Historic Home Burned

Old Landmark In Winnipeg Completely Destroyed By Fire

Winnipeg, Man.—One of Winnipeg's historic old homes, a 24-room mansion standing in four acres of tree grounds, built in the early days of Winnipeg's youth by the late A. F. Eden, one-time land commissioner of the Manitoba and Northwestern Railway, has been destroyed by fire.

The palatial home on Osborne Street and Assiniboine Avenue, which was the old Bandford residence, has stood vacant for some time.

## NO CHANCE IS TO BE MADE IN RUSSIAN POLICY

Ottawa, Ont.—Canada will not alter her policy towards Soviet Russia. In most emphatic terms, Prime Minister R. B. Bennett made this answer to the committee of the World's Grain Show in charge of the building and the contract was awarded to A. W. Banks, of this city. The work will include minor decorations for all walls of the building, ceilings, offices and so forth. The contract price was not announced at the close of the meeting.

Holds Four Championships

Olympic Stadium, Los Angeles, Cal.—The British Empire's small but select athletic bands have captured four of the eight Olympic track and field championships in the world's market by Russia under Soviet leadership with disastrous results to Canadian workers and farmers was instanced by British Minister, "Do you know the workers of this country should not have a fair chance in honest competition," he asked.

Advertising the Boycott

Dublin, Irish Free State.—Dublin awoke this morning to find that in the night some one had gone about the city painting anti-British slogans on the sidewalks of nearly every street. "No surrender," they read, and "Boycott British Goods." Efforts by the police to erase the inscriptions were futile.

## Elects Honorary Benchers

London, Eng.—Rt. Hon. Stanley M. Bruce, leader of the Australian delegation at the Imperial Economic Conference, and Hon. Newton W. Howells of Toronto, were elected honorary benchers of Lincoln's Inn. Lincoln's Inn is one of the four Inns of court to which all English barristers must belong.

## No Capital Expenditure

Ottawa, Ont.—No capital expenditures of any sort are to be made by the Canadian National Railways until after the report of the royal commission on transportation is presented to the government, probably on August 16, Mayor Haysman declared he was informed by Hon. Dr. R. J. Manion, Minister of Railways.

## Man Drops Dead

Regina, Sask.—Hissing to cheer the winner in the second race at an exhibition meet Wednesday afternoon, August 3, M. C. Drog, of Moose Jaw, a railway mail clerk, collapsed and died before medical assistance could be secured. He held tickets on the winning horse.

## Embargo On Potatoes

Montreal, Que.—Canadian potatoes must not be imported into England, and the British embargo must be secured. They included J. B. McLachlan, Cape Breton, and Mrs. T. Wilkinson, North York.

## Tribute to Mt. Isa Doctors

Mt. Isa, June 29, 1932.  
 This afternoon Mr. H. A. Guess, Vice-President of the American Smelting and Refining Co. and Vice-Chairman of the Mining Trust of London, paid a tribute to the medical skill and attention bestowed upon Mrs. Guess, who was stricken with cerebral hemorrhage and other complications on Monday, June 13, just prior to her intended departure with Mr. Guess from Mt. Isa.  
 "The devotion and wonderful skill of Dr. R. H. Vonder Borch, head of the Mt. Isa Hospital," said Mr. Guess, "pulled her through the crisis, so that she is now well on the way toward complete recovery. With Dr. Vonder Borch collaborated Dr. Randle, who is temporarily at Mt. Isa Hospital, and also through the Mt. Isa doctors, I arranged to bring by aeroplane from Sydney, Dr. Allen S. Walker, as consultant, who was piloted to Mt. Isa by Major De Havilland in his De Havilland Puss Moth. I am hoping that Mrs. Guess's condition will permit our departure early in July, returning to New York via London."

This article was contributed by A. Haggitt having received same from Mr. Guess.

The demand for men is slow as everyone is endeavoring to cut expenses in this respect to the lowest possible notch. The beginning of threshing should provide more employment, although runs will be very short as a rule.

Senator Borch pleads for his proposal of an early international conference on world affairs, including war debts. Some Congressmen protest. More European nations might, he believes, if they understood he demands that arms reduction precede debt reduction. He sees only good in this proposed course—prosperity, says the Senator, being better than debt.

A colored fellow went into a bank the other day and said: "I have \$300 in a bank down south, but I'd like to have the money up here where I am now living."

"That's all right," said the banker. "Just give us a check for \$300 and we'll start your account at once."

In a few days the check came back from the southern bank marked "insufficient funds." The banker called his customer and berated him for giving a bad check. "You send that check back," said the customer. "I've got \$200 in that bank."

Within a week or so a certified check came from the southern bank with this explanation: "When we said insufficient funds, we meant the bank had insufficient funds."

## McCullough Bros.

Phone 34

Mrs. A. J. Miller was hostess Friday to the ladies of the Amity Club. The meeting was well attended.

Service will be held at Yetwood school Aug. 14th at 8 p.m. Rev. Peter Dawson officiating.

Mr. and Mrs. T. H. Hale and daughter and Mrs. A. C. McClure of Spokane are guests of V. McClure.

Binders have been going in every direction since the first of this week and already a considerable amount of grain has been cut. The extremely hot weather has brought the grain with a rush.

Last week was a particularly trying one for grain all over the district. Locally the grain seems to be well fitted despite the hot weather but the yield will undoubtedly suffer to some extent. A heavy rain fell over the district Wednesday evening. This would have been welcome at an earlier date.

There should be a good crop of turkeys and spring chickens this fall to judge by the number of grasshoppers available for feed. It is to be hoped, too that the diligence of the fowls will considerably reduce the number of these pests otherwise next year you may see another plague of these insects.

Mesdames L. M. Groves, M. Little, Frank Smith and Howard Smith were Lethbridge visitors Wednesday, taking in the U. F. A. picnic at the Dominion Experimental Farm.
